NACJD Terms of Use

Before downloading or analyzing any dataset from NACJD, users are instructed to read the following:

In preparing data for release through its web site, NACJD staff take steps to safeguard the identity of all research subjects. For example, direct identifiers are omitted from datasets, and other characteristics are recoded or masked if they can be combined to identify individuals.

Any intentional identification or disclosure of a person or establishment violates the assurances of confidentiality given to the providers of the information. Therefore, users of data obtained from the NACJD or any ICPSR archive agree:

- To use these datasets solely for statistical analysis and reporting of aggregated information, and not for investigation of specific individuals or organizations, except when identification is authorized in writing by the archive;
- To make no use of the identity of any person or establishment discovered inadvertently, and to advise the archive of any such discovery;
- To produce no links among NACJD datasets or among NACJD data and other datasets that could identify individuals or organizations; and
- To comply with the request that downloaded material not be redistributed or sold to other individuals, institutions, or organizations without the written agreement of the archive.

Furthermore, Federal law and regulations require that research data collected by the U.S. Department of Justice or by its grantees and contractors may only be used for statistical and research analysis. The applicable law and regulations may be found in the United States Code, 42 USC Section 3789g(a), and the Code of Federal Regulations, 28 CFR 22. Accordingly, any intentional identification or disclosure of a person or establishment may violate Federal law as well as the assurances of confidentiality given to the providers of the information. Therefore, users of data collected by or with the support from the U.S. Department of Justice and distributed by NACJD or other ICPSR archives must agree to abide by these regulations and understand that ICPSR may report any potential violation to the U.S. Department of Justice.

NACJD further asks that any books, articles, conference papers, theses, dissertations, reports, or other publications that employ data or other resources provided by NACJD reference the bibliographic citation provided in the ICPSR study description for each data collection. These citations acknowledge the principal investigators, the data producers, and ICPSR as the data distributor, in accord with recommended citation procedures for computer files in the social sciences. Also, authors of publications based on our data should send copies of their published works or references to the publications to ICPSR for inclusion in a database of related literature.

In addition, the user acknowledges that the original collector of the data, ICPSR, and the relevant funding agency bear no responsibility for use of the data or for interpretations or inferences based upon such uses.

By downloading or analyzing data obtained from NACJD, users signify agreement to comply with the above-stated requirements and give assurance that the use of statistical data obtained from NACJD will conform to widely-accepted standards of practice and legal restrictions that are intended to protect the confidentiality of research subjects.

ICPSR CODEBOOK NOTES

- 1) Users should be aware that some variables in this data collection may contain undocumented codes.
- 2) ICPSR created value labels for certain codes based upon information contained in the variable labels for the data. For some variables, however, the assignment of the code label is unclear. Users are encouraged to read the final report for information about the database construction and coding.
